

AI.DADDY

Building the Future of AI Infrastructure

An AI-focused utility token on Base blockchain — powering accessible, scalable, and practical AI tools for entrepreneurs, creators, and businesses worldwide.

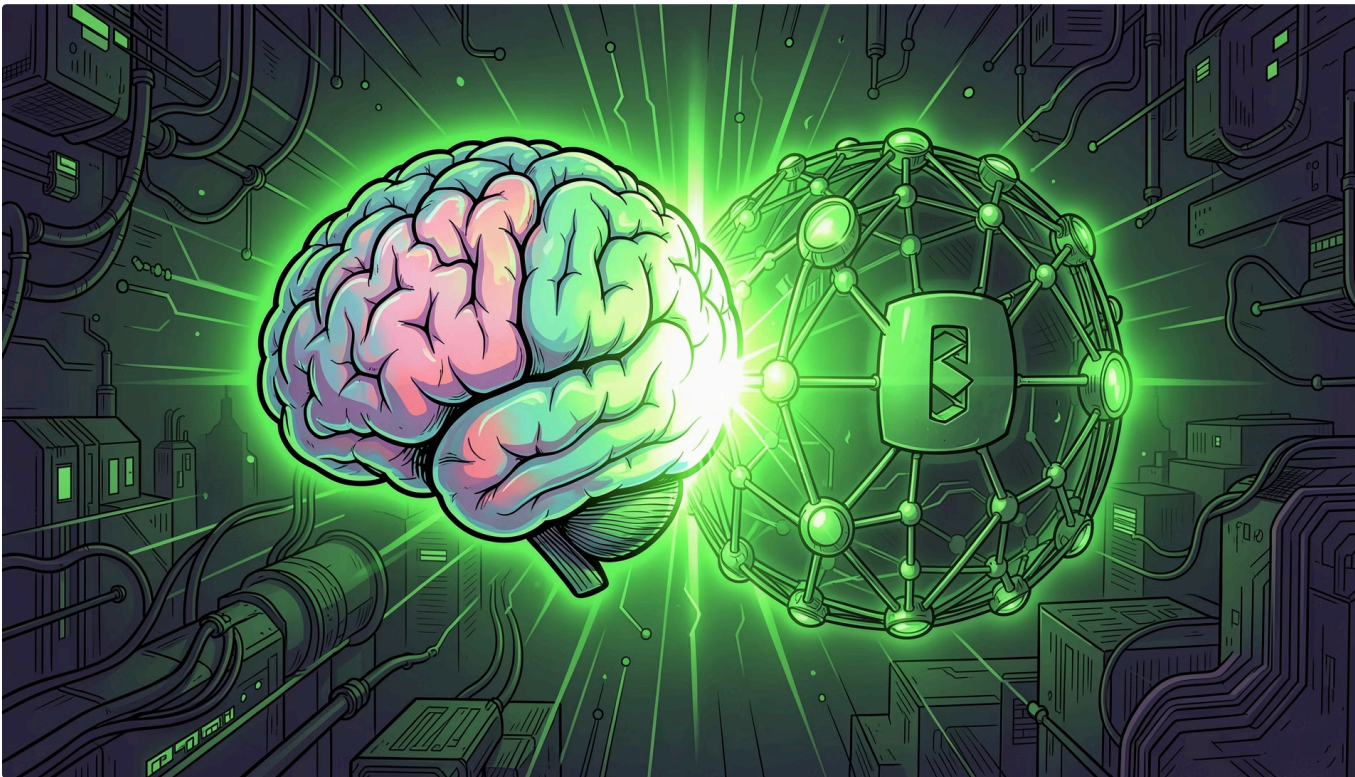

POWERED BY BASE

AI UTILITY ECOSYSTEM

Bridging AI and Web3

The Problem

Artificial Intelligence is transforming every industry — yet most businesses and creators lack affordable, accessible AI tools integrated with modern digital economies.

The AI.DADDY Solution

AI.DADDY bridges the gap between AI and Web3 by delivering a growing ecosystem of practical, scalable AI products — all powered by the DADDY utility token on Base blockchain.

The DADDY Token at a Glance

1B

Fixed Supply

Total DADDY tokens in circulation — no inflation, no surprises.

0%

Buy Tax

Zero friction on entry. Buy freely without penalty.

0%

Sell Tax

Zero friction on exit. Full liquidity, always.

0

Mint Functions

No mint capability. Supply is permanently fixed and immutable.

Built on **Base Chain** for speed, security, and low transaction costs — DADDY is designed for real-world utility, not speculation.

Why Base Blockchain?

⚡ Lightning Fast

Base offers near-instant transactions, enabling seamless AI tool interactions without delays.

💰 Low Cost

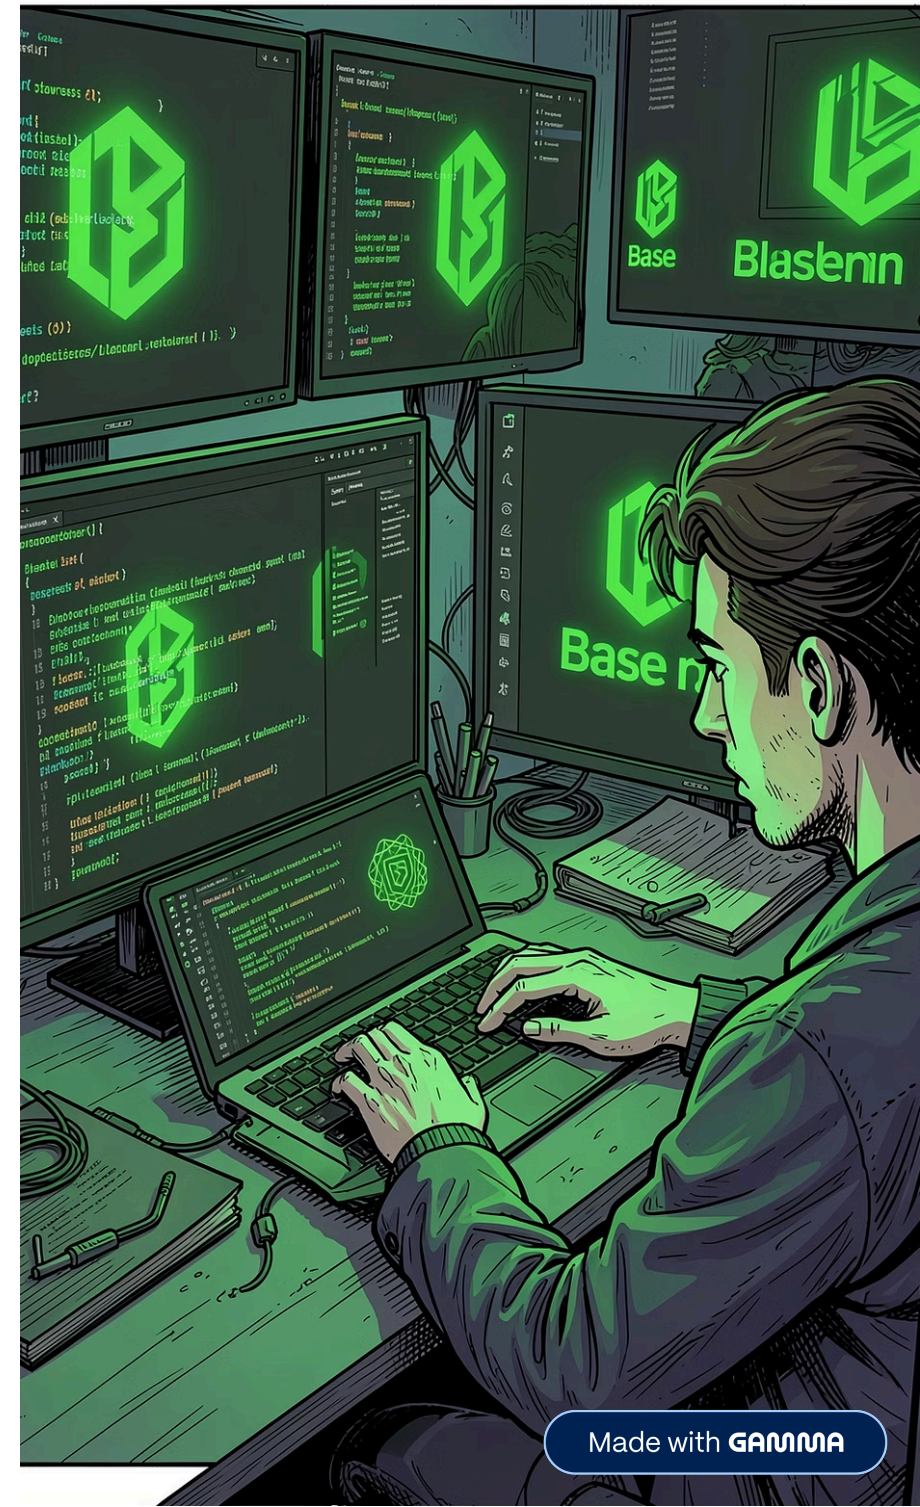

Minimal gas fees make AI services affordable for every user, from solo creators to enterprises.

🔒 Coinbase-Backed

Base is built by Coinbase — bringing institutional-grade security and trust to the ecosystem.

🌐 EVM Compatible

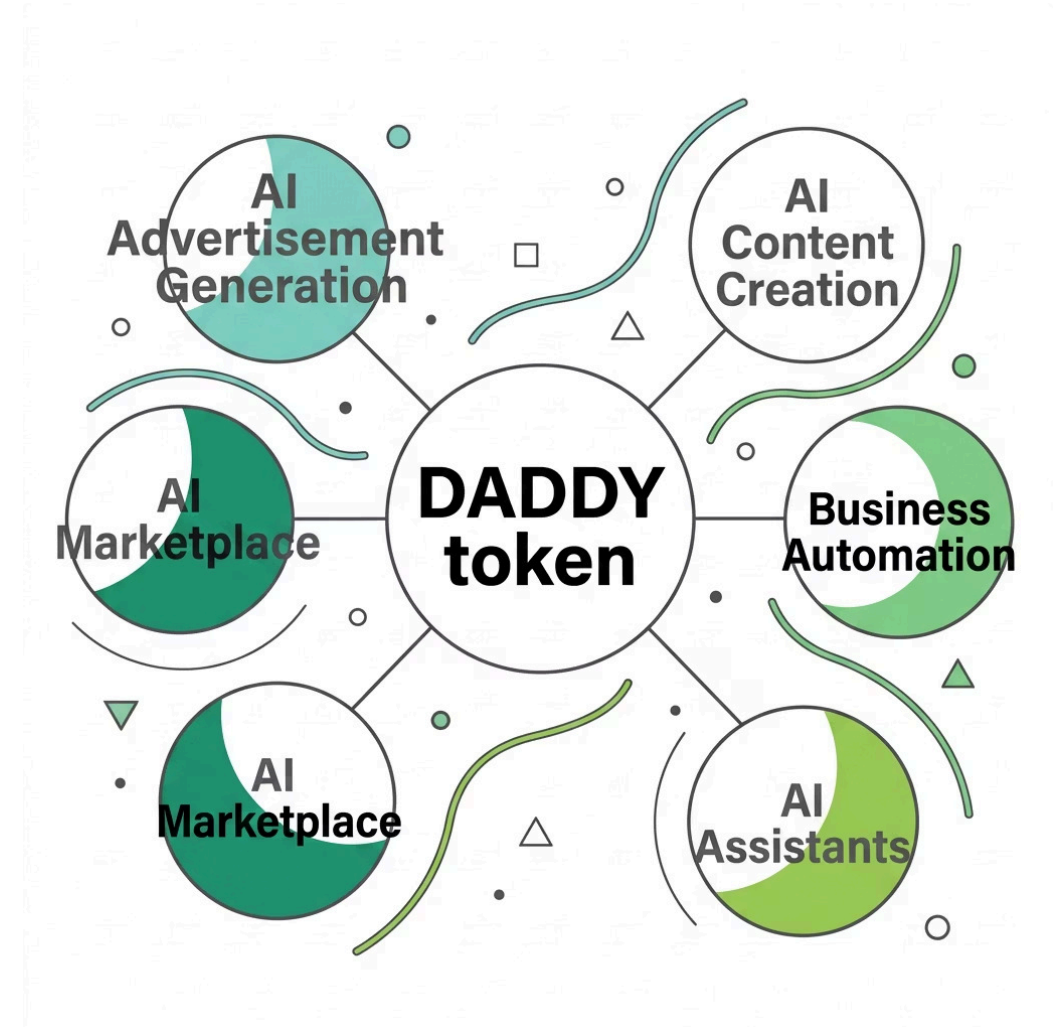

Fully compatible with Ethereum tooling, making integration simple for developers and partners.

A Community-Driven Ecosystem

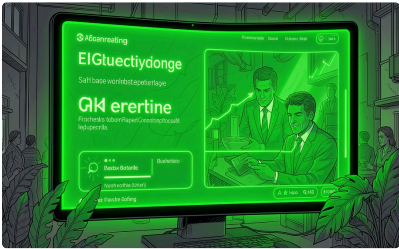

Token Utility

DADDY is the lifeblood of the ecosystem — used to access premium AI services, earn community rewards, and participate in governance decisions shaping the platform's future.

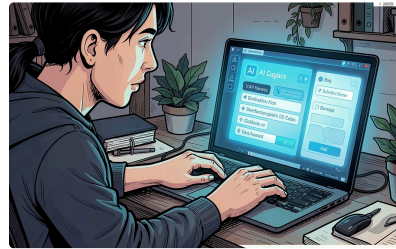

- Access premium AI tools
- Earn community incentives
- Drive ecosystem growth

Core Ecosystem Features

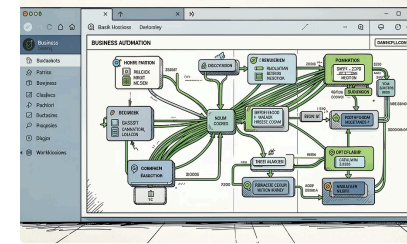

AI Advertisement Generation

Create high-converting ad copy, visuals, and campaigns in seconds — powered by advanced AI models.

AI Content Creation

Generate articles, social posts, emails, and multimedia content at scale with human-quality output.

Business Automation

Automate repetitive workflows, customer support, and operational tasks to free up time for growth.

AI Assistants & Marketplace

AI Assistants

Personalised AI co-pilots designed to help entrepreneurs and teams work smarter — from research and analysis to strategy and execution.

AI-Powered Marketplace

A future marketplace where developers, creators, and businesses can list, discover, and monetise AI tools and services — all transacted in DADDY.

- ❏ The marketplace will create a self-sustaining economy, driving continuous demand for the DADDY token.

Ecosystem Roadmap

Phase 1 — Foundation

Token launch on Base, community building, and core infrastructure development.

1

2

Phase 2 — AI Tools

Launch of AI Advertisement Generation and AI Content Creation platforms.

3

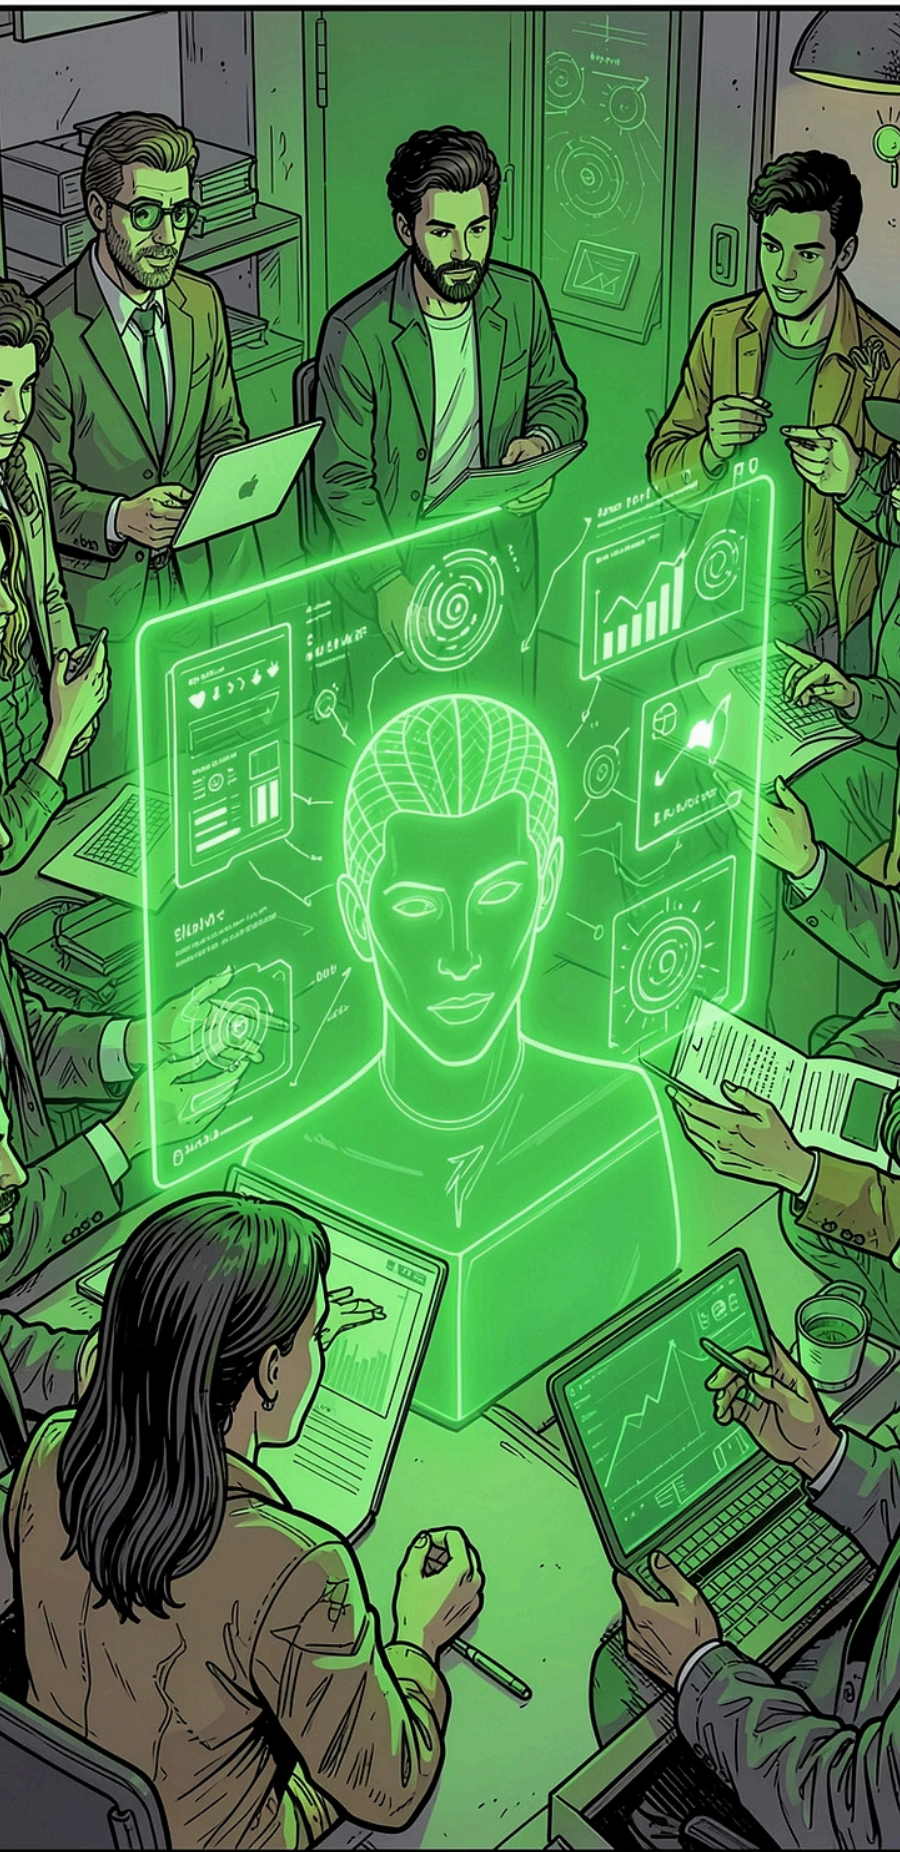

Phase 3 — Automation

Business Automation Solutions and AI Assistants go live for early adopters.

4

Phase 4 — Marketplace

Full AI-powered marketplace opens, enabling third-party AI service monetisation.

Who Is AI.DADDY For?

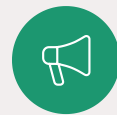

Entrepreneurs

Launch and scale faster with AI-powered automation and content tools.

Creators

Produce more content, more efficiently, without sacrificing quality.

Marketers

Generate campaigns, copy, and creatives at unprecedented speed.

Web3 Investors

Back a utility-first token with real product demand and ecosystem growth.

The Future of AI Infrastructure

AI.DADDY's long-term vision is to become the leading AI infrastructure platform — enabling businesses and individuals worldwide to harness artificial intelligence through simple, powerful, and affordable tools.
